

PAT Testing

We are experts in Portable Appliance Testing and provide a reliable, professional service at great prices to companies, schools, educational institutions, landlords, letting agents and many other types of organisations.

It is essential to have up to date PAT testing records and one of the things things Fire and Safety Inspectors will ask to see on any inspection visit is the PAT records, especially if there has been a fire or an ongoing insurance claim.

Our professional friendly engineers carry the latest PAT testing equipment, complete with bluetooth label printers and barcode scanners which greatly speed up any subsequent PAT tests on the same premises.

For more information please call us on 0844 870 0945.
