

Energy Efficiency

How Green Are You?

The Energy Efficiency Rating is an indicator of the energy costs associated with space heating, water heating, ventilation and lighting. It is expressed on a scale of 1 to 100, the higher the number the lower the running costs of the dwelling.

The Environmental Impact (CO₂) Rating is an indicator of the annual CO₂ emissions associated with space heating, water heating, ventilation and lighting. It is also expressed on a scale of 1 to 100, the higher the number the lower the annual emissions.

We help improve energy efficiency through a number of means;

- energy efficient lighting
- energy efficient heating
- timed switches and timeclocks
- motion sensors
